This medicine has been prescribed for you only. Do not pass it on to others. It may harm them, even if their signs of the illness are the same as yours.

This leaflet contains important information for you.

Do not take Nazdol MR

1. WHAT NAZDOL MR IS AND WHAT IT IS USED FOR

Nazdol MR is a modified-release tablet containing gliclazide. Nazdol MR is used in the treatment of diabetes to keep blood sugar levels at the correct level.

2. BEFORE YOU TAKE NAZDOL MR

Read all of this leaflet carefully before you start taking this medicine because it contains important information for you.

• medicines to treat disorders of the central nervous system (chlorpromazine).

• medicines to treat fungal infections (miconazole, see section ‘Taking other medicines’),

• medicines to treat depression (monoamine oxidase inhibitors),

• medications to treat high blood pressure or heart failure (beta blockers, ACE-inhibitors such as captopril, or enalapril),

• medications to treat infections (e.g. sulphonamides, clarithromycin),

• medicines used to treat high blood sugar (oral antidiabetics, GLP-1 receptor agonists or insulin),

• other medicines used to treat high blood pressure or heart failure (beta blockers, ACE-inhibitors such as captopril, or enalapril),

• medications to treat delirium and agitation in the inpatient elderly and long-term care patients who have advanced dementia (e.g. serotonergic dysfunction of brain and autonomic ganglia or abnormal cortical control).

• If you are fasted,

• if you change your diet,

• if you increase your physical activity without an appropriate increase in carbohydrate intake,

• if you suffer from particular hormone-induced disorders (functional disorders of the thyroid gland, of the pituitary gland or adrenal cortex),

• if you take other medicines or natural remedies at the same time,

• if you drink alcohol, especially in combination with skipped meals,

• if you are an elderly patient taking certain medicines (e.g. those acting on the central nervous system),

• if you increase your physical activity without an appropriate increase in carbohydrate intake,

• medicines to treat disorders of the central nervous system (chlorpromazine),

• medications to treat delirium and agitation in the inpatient elderly and long-term care patients who have advanced dementia (e.g. serotonergic dysfunction of brain and autonomic ganglia or abnormal cortical control).

• if you are taking other medicinal products without professional advice.

2. BEFORE YOU TAKE NAZDOL MR

Read all of this leaflet carefully before you start taking this medicine because it contains important information for you.

• painkillers or anti-inflammatory drugs (ibuprofen, phenylbutazone),

• if you change your diet,

• if you have renal function or liver function is severely decreased.

2. BEFORE YOU TAKE NAZDOL MR

Read all of this leaflet carefully before you start taking this medicine because it contains important information for you.

• if you are taking medicines to treat fungal infections (miconazole, see section ‘Taking other medicines’),

Always take Nazdol MR exactly as your doctor or pharmacist has told you. Check with your doctor or pharmacist if you are unsure. The active substance is gliclazide. Each modified-release tablet contains 30 mg gliclazide.

Nazdol MR is not recommended for use during pregnancy. If you are pregnant or breast-feeding, think you may be pregnant or are planning to become pregnant you should talk to your doctor before taking this medicine for you. Nazdol MR can be used during breastfeeding.

Driving and using machines
Your ability to concentrate or may be impaired if your blood sugar is too low (hypoglycaemia), or too high (hyperglycaemia). These effects are reduced when Nazdol MR is taken with a meal as recommended. This may affect your ability to drive a car or use machines.

COST CONTENTS OF THE PACK AND OTHER INFORMATION
4. POSSIBLE SIDE EFFECTS
The usual dose can vary from one to a maximum of four tablets in a single intake at breakfast. This depends on the

response to treatment. It should be ensured that there is always a pre-informed person that can call a doctor in case of emergency.

If you have any further questions on the use of this product, ask your doctor or pharmacist.

Indigestion
• Vomiting
• Abdominal pain

Nazdol MR contains lactose
Read the leaflet carefully before you start using the medicine. If you have any questions, ask your doctor or pharmacist.

If you forget to take Nazdol MR
• Abnormal liver function tests, changes in your liver (which can cause yellow skin and eyes). If you get this, see your doctor immediately.
• Anaphylactic reactions (allergic reaction which may be fatal), including angioedema (rapid swelling of the tissue such as eyelids, face

3. HOW TO USE THIS MEDICINE
Dosage
This medicine may be taken at any time of the day, with or without food.
