- If you have polyuria (diabetes insipidus).
- If you have renal disease.
- If you have inappropriate secretion of diuretic hormone (your doctor will have told you if you have this condition).

- If you have thrombocytopenia (low levels of blood platelets) in your blood.
- If you have heart failure or any other condition requiring treatment with a diuretic medicine ("water tablets").
- If you have a condition known as “syndrome of inappropriate secretion of diuretic hormone” (your doctor will have told you if you have this condition).

- If you have heart failure or any other condition requiring treatment with a diuretic medicine ("water tablets").
- If you have a condition known as “syndrome of inappropriate secretion of diuretic hormone” (your doctor will have told you if you have this condition).

- If you have a condition known as “syndrome of inappropriate secretion of diuretic hormone” (your doctor will have told you if you have this condition).

- If you have cystic fibrosis.
- If you have inappropriate secretion of diuretic hormone (your doctor will have told you if you have this condition).

- If you have a condition known as “syndrome of inappropriate secretion of diuretic hormone” (your doctor will have told you if you have this condition).

- If you have inappropriate secretion of diuretic hormone (your doctor will have told you if you have this condition).

- If you have diabetes insipidus.
- If you have high blood pressure while taking Desmopressin Spray.
4. Possible side effects

Like all medicines, this medicine can cause side effects although not everybody gets them.

All medicines can cause allergic reactions, although serious allergic reactions are very rare. Tell your doctor straight away if you get any sudden wheeziness, difficulty in breathing, swelling of the eyelids, face or lips, rash or itching (especially affecting your whole body).

If you suffer from a headache with nausea (feeling sick) and/or vomiting, or you have a "1st" (convulsion), contact your doctor straight away.

The following side effects have also been reported:

**Common side effects** (may affect up to 1 in 10 people):
- Conjunctivitis (red eyes caused by an infection)
- Asthenia (weakness)

**Uncommon side effects** (may affect up to 1 in 100 people):
- Nasal congestion
- Epistaxis (nose bleeds)
- Rhinitis (runny nose)
- Nausea (feeling sick)
- Abdominal cramps
- Vomiting
- Headache

**Rare side effects** (may affect up to 1 in 1,000 people):
- Cerebral oedema (water on the brain)
- Hypoesthesia (low levels of sodium in the blood)

**Very rare side effects** (may affect up to 1 in 10,000 people):
- Emotional disturbance (in cases of bedwetting)
- Allergic reactions, e.g. pruritus (itching), exanthema (rash), fever
- Bronchospasms (difficulty in breathing or wheezing)
- Anaphylaxis (serious allergic reaction which causes difficulty in breathing or dizziness).

Due to increased water reabsorption, blood pressure may rise and in some cases hypertension (high blood pressure) may develop. If you suffer from coronary heart disease, chest pain (angina) may occur. These side effects, except for allergic reactions, may be prevented or disappear if the Desmopressin dose is reduced. Tell your doctor straight away if you get any of these side effects.

**Reporting of side effects**

If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet. You can also report side effects directly via the Yellow Card Scheme (website: www.mhra.gov.uk/yellowcard). By reporting side effects, you can help provide more information on the safety of this medicine.

5. How to store Desmopressin Spray

Keep Desmopressin Spray out of the sight and reach of children.

Store in the original packaging. Do not store above 25°C. Store in an upright position.

Discard 4 weeks after first opening. Do not throw away any medicines via wastewater or household waste. Ask your pharmacist how to throw away medicines you no longer use. These measures will help protect the environment.

6. Contents of the pack and other information

**What Desmopressin Spray contains**:
- The active substance is desmopressin (as acetate trihydrate) 100 micrograms/ml
- The other ingredients are citric acid monohydrate, disodium phosphate dihydrate, sodium chloride and purified water.

**What Desmopressin Spray looks like and the contents of the pack**:
Your medicine is a nasal spray solution containing 100 micrograms desmopressin acetate trihydrate per ml of solution. Each spray delivers 10 micrograms of desmopressin acetate trihydrate. The bottle contains 60 doses (sprays). There will always be a small amount of fluid left over in the bottle which it is not possible to use. The spray is contained in a brown glass bottle fitted with a metering pump.

**Marketing Authorisation Holder**:
