2. Before you take
3. How to take
4. Possible side effects
5. How to store
6. Further information

1. What Folic Acid tablets are and what they are used for

Folic Acid belongs to the vitamin B group. Folic Acid tablets may be used:

- to treat:
  - folate deficiency anaemia caused by poor diet, poor absorption of food (such as in coeliac disease or a digestive disorder called sprue) or increased use of folate in the body (as in pregnancy)
- to prevent:
  - folate deficiency caused by some medicines (e.g., those used to treat epilepsy such as phenytoin, phenobarbital and primidone)
  - folate deficiency caused by long-term red blood cell damage or kidney dialysis
  - neural tube defects in babies (e.g., spina bifida), where women are at risk of having an affected child.

2. Before you take

**Do not take** Folic Acid tablets and **tell** your doctor if you have:

- an **allergy** (hypersensitivity) to folic acid or any of the other ingredients in the tablets (see section 6)
- an untreated **vitamin B₁₂ deficiency** such as in certain anaemias and lifelong vegetarians
- **pernicious anaemia** (a form of anaemia caused by lack of vitamin B₁₂) or another condition caused by vitamin B₁₂ deficiency
- a **malignant** (cancerous) disease.

**Check with your doctor or pharmacist** before taking Folic Acid tablets if you:

- have a folate dependent **tumour**
- are **pregnant**
- have any disease that reduces the amount of vitamin B₁₂ in the body.

**Taking other medicines**

Please **tell your doctor or pharmacist** if you are taking or have recently taken any other medicines, including medicines obtained without a prescription. Especially:

- antiepileptics (to treat epilepsy) such as phenytoin, phenobarbital and primidone
- antibacterials (to treat infections) such as chloramphenicol and co-trimoxazole
- sulfasalazine (to treat ulcerative colitis, Crohn’s disease or rheumatoid arthritis)
- methotrexate (to treat Crohn’s disease, psoriasis or rheumatoid arthritis)

**Pregnancy and breast-feeding**

If you are pregnant, planning to become pregnant or are breast feeding ask your doctor or pharmacist for advice before taking any medicine.

**Sugar intolerance**

If you have been told you have an intolerance to some sugars, contact your doctor before taking this medicine, as it contains lactose.

How to take
Always take Folic Acid tablets exactly as your doctor has told you. If you are not sure, check with your doctor or pharmacist.
Swallow the tablets with water.

Doses:
Adults (including the elderly):
- To treat folate deficiency anaemia: 5mg a day for 4 months, which may be increased up to a maximum of 15mg a day.
- To prevent folate deficiency caused by some medicines: 5mg a day for 4 months, which may be increased up to a maximum of 15mg a day.
- To prevent folate deficiency caused by long-term red blood cell damage or kidney dialysis: 5mg every 1-7 days.
- To prevent neural tube defects in babies, where women are at risk of having an affected child: 5mg a day started before conception and continued throughout the first three months.
- To treat folate deficiency during pregnancy: 5mg a day continued to birth.

Children:
For young children a more suitable form of the medicine should be used.
- To treat folate deficiency anaemia: Children 1-18 years old: 5mg a day for 4 months. The maintenance dose is 5mg every 1-7 days.
- To treat haemolytic anaemia and metabolic disorders: Children 1-12 years old: 2.5mg-5mg once a day. Children 12-18 years old: 5-10mg once a day.
- To prevent folate deficiency in kidney dialysis: Children 1-12 years old: 250-micrograms per kg of body weight (up to a maximum of 10mg) once a day. Children 12-18 years old: 5-10mg once a day.

If you take more than you should
If you (or someone else) swallow a lot of the tablets at the same time, or you think a child may have swallowed any, contact your nearest hospital casualty department or tell your doctor immediately.

If you forget to take the tablets
Do not take a double dose to make up for a forgotten dose. If you forget it and then take the next dose at the right time.

Possible side effects
Like all medicines, Folic Acid tablets can cause side effects, although not everybody gets them.
Tell your doctor if you notice any of the following side effects, they get worse or you notice any not listed:

• Stomach and intestines: Stomach pain, wind, bloated feeling, a bloated feeling, wind.
• Skin: Rash, itching, red skin.
• Allergic reaction (hypersensitivity) e.g. itchy/red skin, rash, swelling of the face, lips, tongue or throat or difficulty breathing or swallowing, shock (cold sweaty skin, weak pulse, dry mouth, dilated pupils).
• Stomach and intestines: loss of appetite, feeling sick, a bloated feeling, wind.

Reporting of side effects
If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet. You can also report side effects directly via the Yellow Card Scheme at: www.mhra.gov.uk/yellowcard

By reporting side effects you can help provide more information on the safety of this medicine.

How to store
Keep out of the sight and reach of children.
Store below 25°C in a dry place.
Protect from light.
Do not use Folic Acid tablets after the expiry date stated on the label/carton/bottle. The expiry date refers to the last day of that month.

Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist how to dispose of medicines no longer required. These measures will help to protect the environment.
