1. What Prednisolone Oral Solution is and what it is used for

Your doctor has decided that you or your child, needs this medicine.

Prednisolone Oral Solution is a corticosteroid medicine. Prednisolone Oral Solution is manufactured in the form of oral solution.

It contains the active ingredient prednisolone. Prednisolone is a type of medicine called corticosteroids (which is corticosteroids). Corticosteroids occur naturally in the body and help to maintain health and well-being. Boiling your body with extra corticosteroids (such as corticosteroids) can cause various illnesses involving inflammation in the body.

Prednisolone Oral Solution is used for the treatment of a variety of illnesses involving inflammation in the body.

It is important that you have read all the information supplied with this medicine and fully understand this leaflet. If you do not understand any part of the leaflet, you should ask your doctor or pharmacist for information.

2. How to use Prednisolone Oral Solution

Do not take Prednisolone Oral Solution:

- if you are allergic to prednisolone or any of the other ingredients of this medicine (listed in section 6). Signs of a severe allergic reaction include a red and lumpy skin rash, difficulty breathing, swelling of face, mouth, lips or eyes, unexplained high temperature or feeling generally unwell.

- if you have liver or kidney problems;

- if you have or have a family history of the following:
  - diabetes
  - epilepsy (fits)
  - if you have ever previously suffered from muscle weakness when using prednisolone or any other steroids, in the past
  - if you have or have had, a stomach ulcer
  - if you have an underlying disease that can affect your vision

If you have any of the above conditions, your doctor may monitor you carefully whilst you are taking this medicine and stop prednisolone if any signs of illness are the same or worse.

- if you or your child have side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet.
