What is this in a leaflet? A leaflet is a written document that provides information about a medication or medical condition. It usually contains information about the medication's purpose, how to take it, possible side effects, and any precautions to be taken.

What is SPORANOX? SPORANOX is a medication used to treat fungal infections. It is available as a solution that can be taken orally.

How to use SPORANOX? SPORANOX is typically taken by mouth with or without food. The dose and duration of treatment will be determined by your doctor based on your specific condition.

What to do if you miss a dose? If you miss a dose of SPORANOX, take it as soon as you remember. However, if it is almost time for your next dose, skip the missed dose and continue with your regular dosing schedule. Do not take a double dose to make up for a missed one.

Important information about SPORANOX: SPORANOX is generally safe and well-tolerated. However, it may cause side effects such as nausea, vomiting, diarrhea, or yeast infections. If you experience any of these side effects, talk to your doctor as soon as possible.

Remember, always read all information provided with your medication and consult your doctor or pharmacist if you have any questions about your treatment.

What to do if you have an allergic reaction? If you experience an allergic reaction to SPORANOX, such as itching, swelling, or difficulty breathing, seek medical attention immediately. Do not continue taking the medication and contact your doctor for further advice.

How to store SPORANOX? Store SPORANOX at room temperature, away from direct sunlight and moisture. Do not freeze. Once opened, use the solution within 14 days.
If you do find that you are pregnant after starting treatment with SPORANOX has finished. for some time after you stop taking it, you become pregnant while you are taking your contraceptives to make sure that you do not talk to your doctor.
