Diazemuls is used to treat epilepsy and to treat asthma and other breathing problems (to treat obesity). Diazemuls is also used (an inherited condition causing a heightened sense of wellbeing when opioids are experiencing such symptoms. You may experience muscle spasms due to tetanus or poisoning. Diazemuls can cause confusion and have effects on your breathing and blood pressure. Breakthrough bleeding can occur when taking oral contraceptives, even if you are using them correctly and consistently. Diazemuls can cause you to feel sleepy for longer or cause difficulty in sleeping.
Diazemuls is a white, milky fluid.

What Diazemuls contains:

- Diazepam 3 mg/mL
- Water for injection
- Sodium hydroxide, and water for injections.
- Monoglycerides, egg phospholipids, glycerol, sodium hydroxide, and water for injection.

The other ingredients are soya bean oil, a polysorbate emulsifier, monoglycerides, egg phospholipids, glycerol, sodium hydroxide, and water for injection.

Very rare (may affect up to 1 in 10,000 people)

- Anaphylaxis (severe allergic reaction) with symptoms such as shock, breathing difficulties, and feelings of swelling, tightness, or heat in your skin, lips, tongue, or throat
- Very low levels of white blood cells (leukopenia)
