• prevention of migraine
• treatment of epilepsy

How to store Topiramate tablets
Do not store above 30°C. Keep the packaging tight to protect from light.

Possible side effects
Take this medicine regularly and do not stop taking it suddenly, even if you feel better.

Possible side effects
These include:
• weight loss
• nausea
• muscle cramps
• vomiting
• headache
• constipation
• lack of appetite
• dry mouth

Topiramate tablets contain:
- active substances:
  - Topiramate 25mg, 50mg, 100mg and 200mg - 158

- inactive substances:
  - lactose (soya), lecithin (soya), stearic acid, microcrystalline cellulose, sodium stearyl fumarate, magnesium stearate, titanium dioxide.

Topiramate tablets are usually taken 1-2 times a day. You can decide which time of the day is best for you, but it is important to take the tablets regularly. If you find you are unable to take the tablets as recommended, your doctor may adjust the dose of the medicine or suggest an alternative treatment. If you are a woman of childbearing potential and you are pregnant, you should not use Topiramate tablets.

Topiramate tablets are usually taken as a single dose. The dose may be increased gradually over a period of time, up to a maintenance dose, usually 200–600mg a day.

Topiramate tablets should be kept in a cool place, away from direct sunlight.

Topiramate tablets are usually taken with a glass of water.
