Emulsifying Ointment BP

Emulsifying wax, White soft paraffin, Liquid paraffin

New safety information

Fire hazard. Do not smoke or go near naked flames; clothing & bedding with this product dried on them can catch fire easily.

Emulsifying Ointment is a semi-opaque waxy ointment, used in the pharmacy as an ingredient in the preparation of Aqueous Cream and Buffered Cream. Emulsifying Ointment contains: Emulsifying wax 30% w/w, white soft paraffin 50% w/w and liquid paraffin 20% w/w.

How to use Emulsifying Ointment: Information will be provided with the final preparation.

Storing Emulsifying Ointment: Keep out of the sight and reach of children. Store below 25°C. Do not freeze.

Caution: This preparation may make skin and surfaces slippery particularly when having a bath or shower. If you have any further questions on the use of this product, ask your pharmacist or doctor.

If you use more than you should, or if the product is accidentally swallowed: contact your doctor or pharmacist immediately.

Side effects:
Like all medicines, this medicine can cause side effects although not everybody gets them. Side effects include occasional allergic reaction, acne, inflammation or infection of hair follicles (folliculitis), stinging, burning, itching, redness, contact dermatitis and rash.

Reporting of side effects:
If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet. You can also report side effects directly via the Yellow Card Scheme at www.mhra.gov.uk/yellowcard. By reporting side effects you can help provide more information on the safety of this medicine.

Do not use after the expiry date shown on the label. Your pharmacist will dispose of any unused cream.

WARNING: Do not smoke or go near naked flames - risk of severe burns. Fabric (clothing, bedding, dressings etc) that has been in contact with this product burns more easily and is a

stick on area (no print here)

serious fire hazard. Washing clothing and bedding may reduce product build-up but not totally remove it.

Do not use if you are allergic to any of the ingredients of this product.

Take special care: This product (which contains cetearyl alcohol and sodium lauryl sulphate) may cause local skin reactions (e.g. stinging, burning, itching, redness and contact dermatitis) particularly in children with atopic eczema. This product has been found to have major sunscreen activities and should not be used before light treatments (phototherapy) or phototesting.

Use this medicine only on your skin

Pregnancy:
The safety of Emulsifying Ointment during pregnancy and breast-feeding has not been established. Discuss with your doctor.

Manufacturer: Pinewood Laboratories Ltd., Ballymacarby, Clonmel, Co. Tipperary, Ireland or CP Pharmaceuticals Ltd., Ash Road North, Wrexham, LL13 9UF, United Kingdom.
