Fucidin® 20 mg/g cream
fusidic acid

Read all of this leaflet carefully before you start using this medicine because it contains important information for you.
- Keep this leaflet. You may need to read it again.
- If you have any further questions, ask your doctor, pharmacist or nurse.
- This medicine has been prescribed for you only. Do not pass it on to others. This includes any possible side effects not listed in this leaflet. See section 4.

What is in this leaflet
1. What Fucidin® cream is and what it is used for
Fucidin cream contains fusidic acid. It is a type of antibiotic.
Fucidin cream works by killing germs (bacteria) that cause infections.

1. What Fucidin cream is and what it is used for
Fucidin cream is used to treat conditions where the skin is infected by germs (bacteria), such as:
- Impetigo (a weeping, crusty and swollen patch of skin)
- Infected dermatitis (inflammation of the skin) and spots
- Infected cuts and grazes.

2. What you need to know before you use Fucidin cream
Do not use Fucidin cream
- If you are allergic to fusidic acid or any of the other ingredients of this medicine. (listed in section 6).

Warnings and precautions
Talk to your doctor, pharmacist or nurse before using Fucidin cream.
- Take special care if you are going to use Fucidin cream over a long time or in large amounts.
- If you use the cream over a long time or in large amounts it may make the chance of getting any side effects higher. Also your skin may get more sensitive to this medicine.

Other medicines and Fucidin cream
Tell your doctor, pharmacist or nurse if you are taking, have recently taken or might take any other medicines.

Pregnancy and breast-feeding
If you are pregnant or breast-feeding, have recently taken or might take any other medicines.

Driving and using machines
Usually your medicine will have very little effect on your ability to drive or use machines. Check with your doctor if you feel any side effect that may stop you from driving or using machines.

Fucidin cream contains
- Butylhydroxyanisole (E320). This may give you an itchy rash and inflammation on your skin where your medicine is used. This may also cause irritation to the eyes and mucous membranes (such as lips or genital area).
- Cetyl alcohol. This may give you an itchy rash and inflammation on your skin where your medicine is used.
- Potassium sorbate. This may give you an itchy rash and inflammation on your skin where your medicine is used.

Please ask your doctor if you are worried about any of the ingredients in this medicine.

3. How to use Fucidin cream
Always use this medicine exactly as your doctor or pharmacist has told you. Check with your doctor or pharmacist if you are not sure.

How to put on Fucidin cream
This medicine is only for using on your skin or the skin of a child. Do not swallow it. Do not put it inside your body.

Remove the cap. Check the seal is not broken before you first use the cream. Then push the spike in the cap through the seal on the tube.

Always wash your hands before using Fucidin cream. Rub the medicine gently on the skin. If you use it on your face be careful to avoid your eyes.

Unless you are using the cream to treat your hands, always wash your hands after using Fucidin cream.

If you accidentally get any medicine in your eye, wash it out with cold water straight away. Then bathe your eye with eyewash if possible. Your eye may sting. If you start to have any problems with your sight or your eye is sore, contact your doctor immediately.

How much Fucidin cream to use
Your doctor will tell you how much Fucidin cream to use.

Usually, you should use this medicine three or four times each day.
If you have been told to cover the skin with any dressings or bandages you may not need to use the medicine so often. A nappy on a baby may act as a dressing. Follow the advice of your doctor.

If you use more Fucidin cream than you should
If you accidentally apply too much cream or a small quantity of the cream is accidentally swallowed, it is unlikely to cause any harm. If a larger quantity of the cream is accidentally swallowed or you are worried contact your doctor, pharmacist or A & E department for advice.

If you forget to use Fucidin cream
If you forget to use this medicine, use it as soon as you remember. Then next use this medicine at the usual time.

If you have any further questions on the use of this medicine, ask your doctor, pharmacist or nurse.

4. Possible side effects
Like all medicines, this medicine can cause side effects, although not everybody gets them.

Important side effects to look out for:

- Rare (may affect up to 1 in 1,000 people)
  You must get urgent medical help if you have any of the following symptoms.
  You may be having an allergic reaction:
  - You have difficulty breathing
  - Your face or throat swell
  - Your skin develops a severe rash.

Other possible side effects:

- Irritation at site of application (including pain, burning, irritation, stinging and skin redness)
- Itching
- Rash
- Eczema.
