Nurofen Cold & Flu

Contains Ibuprofen and Pseudoephedrine Hydrochloride

INFORMATION FOR THE USER

Read all of this leaflet carefully before you start taking this medicine because it contains important information for you.

Always take this medicine exactly as described in this leaflet or as your doctor or pharmacist have told you.

Keep this leaflet. You may need to read it again.

Ask your pharmacist if you need more information or advice.

If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet. See section 4.

You need to talk to a doctor if you do not feel better or if you start to feel worse.

What is in this leaflet:

1. What is Nurofen Cold & Flu & is what it is used for

2. How to take Nurofen Cold & Flu

3. Possible side effects

4. What to store Nurofen Cold & Flu & what it is used for

5. Nurofen Cold & Flu tablets contain two active ingredients (which make the medicine work). These are ibuprofen and pseudoephedrine hydrochloride. Ibuprofen belongs to a group of medicines known as non-steroidal anti-inflammatory drugs (NSAIDs). NSAIDs reduce pain, swelling and high temperature. Pseudoephedrine belongs to a group of drugs called vasoconstrictors which act on the blood vessels in the nose and throat to reduce the amount of swelling in these areas.

Nurofen Cold & Flu tablets contain two active ingredients (which make the medicine work): ibuprofen 200mg and pseudoephedrine hydrochloride 30mg.

Each tablet contains the active ingredients ibuprofen 200mg and pseudoephedrine hydrochloride 30mg.

Unsuitable for children under 12 years.

How to store Nurofen Cold & Flu

Keep all medicines out of the sight and reach of children.

5. How to store Nurofen Cold & Flu

Note that any low resolution paper Canon colour and Print Specification

Some other medicines may also affect or be affected by the use of Nurofen Cold & Flu. You should therefore always seek the advice of your doctor or pharmacist before you use Nurofen Cold & Flu with other medicines.

Other warnings

• Nurofen Cold & Flu belongs to a group of medicines which may impair fertility in women. This is reversible on stopping the medicine and is unlikely to affect a woman planning to become pregnant. However, if you are pregnant while you are taking this medicine your doctor may recommend you to stop taking it.

• Antineutrophilic anti-inflammatory drugs such as ibuprofen may be associated with a small increased risk of heart attack or stroke, particularly when used at high doses. Do not exceed the recommended dose or duration of treatment.

• You should discuss your treatment with your doctor or pharmacist before taking Nurofen Cold & Flu if:

• have heart problems including heart failure, angina (chest pain), or you have had a heart attack, bypass surgery, peripheral artery disease (your circulation in the legs of feet due to narrowing or blocked arteries), or any kind of stroke (including `mini-stroke` or transient ischaemic attack `TIA`)

• have high blood pressure, diabetes, high cholesterol, have a family history of heart disease or stroke, or if you are a smoker.

• are women of childbearing age and are breastfeeding

• have severe heart, kidney or liver problems

• have severe heart disease or very high blood pressure

• are taking other NSAID painkillers or more than 75mg ibuprofen and Pseudoephedrine Hydrochloride (which make the medicine work). These are ibuprofen and pseudoephedrine hydrochloride.

Nurofen Cold & Flu tablets contain two active ingredients (which make the medicine work): ibuprofen and pseudoephedrine hydrochloride.
