How to store Propranolol tablets

Keep Propranolol tablets out of the sight and reach of children.

Do not store the tablets above 25°C. Do not take the tablets after the expiry date which is stated on the carton. The expiry date is also stated on the back of the strip after "Exp". Do not throw away any medicines via wastewater or household waste. Ask your pharmacist how to throw away medicines you no longer use. These measures will help protect the environment.

What Propranolol tablets contain

- the active substance (the ingredient that makes the tablets work) is propranolol hydrochloride. Each tablet contains either 10mg, 40mg, 80mg or 160mg of the active substance.
- the other ingredients are lactose, magnesium stearate, maize starch, stearic acid, hypromellose (E464).
- the coating contains polysorbate, carmoisine (E122), titanium dioxide (E171), iron oxide red (E172), hypromellose (E464).

What Propranolol tablets look like and contents of the pack

Propranolol tablets 10mg are pink, circular, biconvex film-coated tablets impressed "C" on one face and the identifying letters "P" and "A" on either side of a central division line on the reverse. Propranolol tablets 40mg and 80mg are pink film-coated tablets. Propranolol tablets 160mg are pink, circular, biconvex film-coated tablets impressed "C" on one face and the identifying letters "P" and "D" on either side of a central division line on the reverse. Pack sizes are 28 and 56 tablets. Not all pack sizes may be available.

Propranolol tablets with alcohol

You are advised to avoid alcohol whilst taking this medicine.

Driving and using machines

Your medicine is unlikely to affect your ability to drive or to operate machinery. However, some people may occasionally feel dizzy or tired when taking propranolol tablets. If this happens to you, ask your doctor for advice.

Anaesthetics or tests

If you are going to have an anaesthetic or any blood or urine tests, please tell your doctor or dentist that you are taking Propranolol tablets. If you see another doctor or go into hospital, let them know what medicines you are taking.

Propranolol tablets contain Lactose

If you have been told by your doctor that you have an intolerance to some sugars, contact your doctor before taking this medicinal product.

Propranolol tablets contain Carmoisine (E122)

Propranolol tablets contain carmoisine (E122) which is a source of colour.

Driving and using machines

Your medicine is unlikely to affect your ability to drive or to operate machinery. However, some people may occasionally feel dizzy or tired when taking propranolol tablets. If this happens to you, ask your doctor for advice.

How to take propranolol tablets

Always take this medicine exactly as your doctor or pharmacist has told you. Check with your doctor or pharmacist if you are not sure.

Propranolol tablets should be swallowed with a drink of water, before meals.
