1 What this medicine is and who it is for

1.1 Indications

Nicorette QuickMist is a nicotine replacement therapy (NRT) to help you give up smoking. It is used when you are giving up smoking to reduce cravings and withdrawal symptoms and to help you prevent relapse. Nicorette QuickMist provides useful information on how to cut down your daily cigarette intake and increase your chances of success. Nicorette QuickMist can also help you to stop smoking completely.

1.2 How much you can get

If you are unable to stop smoking completely, nicorette QuickMist mouthspray can help towards the procedure. If you have any questions or are not sure about anything please ask your doctor, nurse or pharmacist.

2 How to use this medicine

2.1 Do not use nicorette® QuickMist

If you are under 12 years of age.

2.2 Do not exceed the maximum amount of NRT

If you feel unable to stop smoking or do not want to smoke

2.3 Benefits you can get from using NRT

The benefits of stopping smoking for both the user and the carer will be achieved through the line of your mouth. This is the use of nicotine replacement therapy (NRT). Nicorette QuickMist is a nicotine replacement therapy (NRT) to help you give up smoking. It is used when you are giving up smoking to reduce cravings and withdrawal symptoms and to help you prevent relapse. Nicorette QuickMist provides useful information on how to cut down your daily cigarette intake and increase your chances of success. Nicorette QuickMist can also help you to stop smoking completely.
