

# eumocream<sup>®</sup>

25% w/w glycerol

Specially formulated to moisturise:

- Dry, sensitive, itchy skin
- Skin prone to eczema & dermatitis

100 g

Hydrating Treatment

Please read right through this information carefully before you start using this medicine.

#### What Eumocream does

Eumocream is a non-steroid, hydrating treatment cream specifically formulated to moisturise dry, sensitive, itchy skin conditions, including skin prone to eczema and dermatitis. The active ingredient is glycerol which combines with the other ingredients to moisturise and protect your skin by retaining moisture deep within the skin.

#### Check before you use

##### Do not use Eumocream:

- if you have ever had an allergic reaction to glycerol or to any of the other ingredients (see Further information).

##### Take special care with Eumocream

- Avoid contact with the eyes.
- Talk to your doctor before using the cream if you are pregnant or breast-feeding.

#### How to use Eumocream

Use this medicine only on your skin. Apply the cream to the affected skin as needed. Eumocream can be used on all areas of the body including the face. If your symptoms persist, see your doctor.

#### Possible side effects

Like all medicines, Eumocream can have side effects, such as local skin reactions, but these are rare.

##### Reporting of side effects

If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed on this carton. You can also report side effects directly via the Yellow Card Scheme at: [www.mhra.gov.uk/yellowcard](http://www.mhra.gov.uk/yellowcard). By reporting side effects you can help provide more information on the safety of this medicine.
