Your doctor, nurse or pharmacist will decide the correct dose for you and how and when the injection will be given.

If you are given more Diazepam Injection BP than you should require immediate medical treatment:

- Blurred vision, double vision and involuntary eye movements (these side effects disappear after withdrawal)
- Allergic skin reactions in the form of itching, skin rash, redness, swelling or blisters
- Increased salivation
- Stomach and intestinal problems such as nausea, vomiting, cramps, diarrhea
- Headache
- Dizziness
- Balance disorders
- Difficulty in concentrating
- Memory loss
- Muscle weakness
- Loss of coordination of muscle movements
- Confusion
- Unconsciousness
- Respiratory arrest (cessation of breathing)
- Respiratory depression (very slow and/or shallow breathing)
- Jaundice (yellowing of your skin or the white of your eyes)
- Fainting or difficulties to swallow
- Anaphylaxis (severe allergic reaction) with symptoms such as sudden wheezing, swelling of your lips, tongue and throat or body, rash, breathing difficulties to swallow.

(Transaminase)

Inspection: 0.04 mg sodium in the information provided with the medicine and instructions given by the prescriber or pharmacist. You have taken it according to the instructions given by the prescriber or pharmacist. If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet. You can also report side effects directly using the Yellow Card Scheme. In the United Kingdom, call the MHRA Yellow Card scheme. In the European Union, please see 'Marketing Authorisation Holder' below.

This leaflet was last revised in April 2020.
