- You must talk to a doctor or pharmacist if you do not feel better or if you feel worse after 3 days.
- Your product is called Paracetamol 1000mg Suppositories but will be referred to as Paracetamol Suppositories throughout this leaflet.

1. WHAT PARACETAMOL SUPPOSITORIES ARE AND WHAT THEY ARE USED FOR

Paracetamol Suppositories contain a medicine called paracetamol. This belongs to a group of medicines called pain-killers (analgesics). A suppository is a small, torpedo-shaped, medicine which is inserted into the back passage (rectum). Paracetamol Suppositories are used to treat pain and high temperature (fever) in adults. They are used when it is difficult to take paracetamol as tablets or syrup.
