Important Safety Alerts for Patients taking Volibris (ambrisentan)

This card contains important information about Volibris. Please read this card carefully before starting your treatment with Volibris.

Your name: _____

Prescribing doctor: _____

If you have questions about Volibris ask your doctor.

Reporting of side effects: If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in the package leaflet. You can also report side effects directly via the Yellow Card Scheme at <http://www.mhra.gov.uk/yellowcard> or search for MHRA Yellow Card in the Google Play or Apple App Store. Side effects should also be reported to GlaxoSmithKline on 0800 221 441. By reporting side effects, you can help provide more information on the safety of this medicine.

Your monthly pregnancy test schedule:

- You must not take Volibris if you are pregnant, or if you are planning to become pregnant
- Women of reproductive potential must use reliable contraception whilst taking Volibris
- It is preferable that you and your partner use two forms of contraception that work in different ways
- If you are in any doubt about which contraceptives to use, consult your doctor or a gynaecologist
- A pregnancy test should be taken every month
- If you miss a period, or if you think you may be pregnant, you must tell your doctor straight away

If you are a woman:

Volibris may harm unborn babies conceived before, during or soon after treatment.

Volibris is teratogenic in animals.

Pregnancy

If you are a woman of child-bearing age read this page carefully

Blood Test for Liver Function

Volibris may cause liver injury.

It is important to have blood tests to monitor your liver function before starting treatment and at regular intervals during treatment to check that your liver is working properly. Monthly liver function tests are recommended.

Your monthly liver blood test schedule:
