

KEYTRUDA® 25 mg/mL concentrate for solution for infusion.

Explanatory note on update to Risk Minimisation Materials

The patient card has been updated to remove the reference to the Northern Ireland eMC as following the implementation of the Windsor Framework, all medicines approved by UK authorities will be available across the United Kingdom, including Northern Ireland. Consequently, all medicines previously listed on the eMC Northern Ireland website are now available on www.medicines.org.uk/emc

As this is only an administrative change the updated card is not being mailed to prescribers.

January 2025 (ONCO-Patient card v14.1)
