This person is **PEANUT-ALLERGIC** and is receiving **PALFORZIA®** (defatted powder of *Arachis hypogaea L.*, semen [peanuts]), to treat peanut allergy. Adverse reactions (including **ANAPHYLAXIS**) with this immunotherapy can be severe and may require emergency treatment with **ADRENALINE** which this person should carry with them at all times.

If you suspect that this person is having **ANAPHYLAXIS**, give a dose of **ADRENALINE** according to the instructions on the adrenaline autoinjector, and contact **EMERGENCY SERVICES** on 999 immediately. Common symptoms of **ANAPHYLAXIS** include: abdominal pain, itching, hives, rash, nausea, vomiting, throat tightness/closure, shortness of breath, wheezing, coughing, dizziness, passing out, and weak pulse.
