

Patient Alert Card

KEYTRUDA®
(pembrolizumab)

Important safety information to minimise the risk of immune-related adverse reactions

May cause some serious side effects which can sometimes become life-threatening and lead to death. These may happen any time during treatment or even after your treatment has ended. You may experience more than one side effect at the same time.

Contact your specialist right away if you develop any signs or symptoms including those not listed on this card. Your doctor may give you other medicines in order to prevent more severe complications and reduce your symptoms. Your doctor may withhold the next dose of pembrolizumab or stop treatment.

For further information, consult the Patient Information Leaflet (PIL) at www.medicines.org.uk/emc or call MSD Medical Information on Tel: 01992 467272.

IMPORTANT

- Do not attempt to diagnose or treat side effects yourself
- **Take this card with you at all times**, especially when you travel, whenever you go to the Accident and Emergency department, or when you must see another doctor
- Carry this card for at least 4 months after the last dose of pembrolizumab.
- Be sure to notify any health care professional you see that you are being treated with pembrolizumab and show them this card
- If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in the package leaflet. You can also report side effects directly via the Yellow Card Scheme at www.mhra.gov.uk/yellowcard or search for MHRA Yellow Card in the Google Play or Apple App Store. Adverse events should also be reported to MSD on Tel: 01992 467272. By reporting side effects you can help provide more information on the safety of this medicine

Lungs

- Shortness of breath
- Chest pain
- Coughing

Important Information for Health Care Providers

This patient is being treated with KEYTRUDA® (pembrolizumab), which can cause immune-related adverse reactions that may appear any time during treatment or even after treatment. Assess patients for signs and symptoms of immune-related adverse reactions. Early diagnosis and appropriate management are essential to minimise any consequences of immune-related adverse reactions.

For suspected immune-related adverse reactions, ensure adequate evaluation to confirm aetiology or exclude other causes. Based on the severity of the adverse reaction, withhold pembrolizumab and administer corticosteroids. **Specific guidelines for managing immune-related adverse reactions are available in the Summary of Product Characteristics for pembrolizumab.**

Consultation with an oncologist or other medical specialist may be helpful for management of organ-specific immune-related adverse reactions.

Please consult the Summary of Product Characteristics for KEYTRUDA at www.medicines.org.uk/emc or call MSD Medical Information on Tel: 01992 467272 for more information.
