Cialis Together 10 mg tablet Checklist

Cialis Together is for the treatment of erectile dysfunction (ED) in adult men 18 years and older; if you are not a man 18 years or older you should not use this product. ED is the difficulty in achieving and/or maintaining an erection sufficient for sexual performance. If this does not describe you, please speak to the pharmacist for further advice.

Please fill out this short checklist before speaking to a pharmacist. Your answers will help the pharmacist determine whether this product is right for you. It is important to answer all the questions and provide information that is as accurate as possible.

Tick the boxes that best applies; **please answer all the questions.**

IMPORTANT: Erectile dysfunction may be an early sign of diseases such as heart disease or diabetes. You are advised to have a health check with your doctor within 6 months, to find out what could be causing your erectile dysfunction symptoms.
