Important information for patients and caregivers

- Tremelimumab can cause serious side effects needing immediate medical attention to help reduce your symptoms
- If you are uncertain about any symptoms (this includes any possible side effects not listed in the patient information leaflet) contact your healthcare team and seek medical attention immediately.
- Side effects can occur weeks and months after stopping treatment
- For more information, refer to the Patient Information Leaflet
- Remember to show this card to any healthcare professional you consult

Important information for healthcare professionals

- This patient is being treated with tremelimumab, which is associated with immune-mediated adverse reactions (imARs)
- Immune-related adverse reactions (imARs) may appear at any time during treatment or months after its discontinuation
- Early diagnosis and appropriate management are essential to minimise potentially life-threatening complications
- Consultation with an oncologist or the patient's usual healthcare team may be helpful for management of imARs
- Adverse events should be reported. Reporting forms and information can be found at www.yellowcard.mhra.gov.uk or search for MHRA Yellow Card in the Google Play or Apple App Store. Adverse events should also be reported to AstraZeneca by visiting www.contactazmedical.astrazeneca.com or by calling 0800 783 0033.

Tremelimumab Patient Card

This leaflet is only intended for patients prescribed tremelimumab and their caregivers. Carry this card with you at all times, **including after stopping treatment**, and show it to any healthcare professionals involved in your care.

▼ This medicine is subject to additional monitoring.

Created and funded by AstraZeneca.

GB-68071 | DOP: June 2025.

AstraZeneca

What to do if you suspect a side effect, even if it is not listed in this card or the Patient Leaflet

- **If you experience any side effects, contact your healthcare team and seek medical attention immediately**
- DO NOT treat any symptoms yourself before talking to your doctor
- Talking to your doctor is important and they will want to know about these side effects, you will not be bothering them

Symptoms that may appear mild can quickly worsen if left untreated.
