Read all of this leaflet carefully before you start using the medicine because it contains important information for you. If you have any further questions, ask your doctor or pharmacist.

This medicine has been prescribed for you only. Do not pass it on to others. If you think you are allergic to your doctor or pharmacist. This indicates any allergic reaction which may not be limited to the list below. See section 4.

What is Omeprazole? 
Omeprazole capsules are gastro-resistant capsules (Gastro-resistant capsules)

Omeprazole 10 mg and 20 mg Gastro-resistant capsules

What this leaflet contains
1. What Omeprazole capsules are for and how they are used for
2. What you need to know before you take Omeprazole capsules
3. Possible side effects
4. How to store Omeprazole capsules
5. Contents of the pack and other information

1. What Omeprazole capsules are for and how they are used for
Omeprazole contains the active substance omeprazole. This is used for the treatment of erosive oesophagitis coaches, including those after surgery, of duodenal ulcers and stomach ulcers, and of heartburn and acid reflux.

Omeprazole is used to treat the following conditions:
- Gastro-oesophageal reflux disease (GERD)
- Duodenal ulcers
- Stomach ulcers
- Heartburn and acid reflux

Omeprazole is used at the following strengths:
- Gastro-resistant capsules: Omeprazole 10 mg and 20 mg

What you need to know before you take Omeprazole capsules
Do not take Omeprazole if you are allergic to omeprazole or to any of the other constituents of this medicinal product.

If you have any of the following medical conditions, you should consult your doctor before taking this medicine:
- Ulcers caused by medicines called NSAIDs (nonsteroidal anti-inflammatory drugs)
- Ulcers caused by medicines called antibiotics (sulphonamides)
- Ulcers caused by medicines called H2 receptor blockers (cimetidine, ranitidine)
- Ulcers caused by medicines containing vitamin B12 compounds
- Ulcers caused by medicines containing H2 receptor blockers (cimetidine, ranitidine)

If you have any of these conditions, your doctor may also prescribe antibiotics to treat the infection and allow the ulcer to heal.

If you are due to have a specific blood test (e.g. liver function tests, Chromogranin A), tell your doctor before taking this medicine, as it can affect the results.

If you have been told by your doctor that you have a peptic ulcer or other cause of excess stomach acid, your doctor may also prescribe antibiotics to treat the infection and allow the ulcer to heal.

Special considerations
Omeprazole may reduce the amount of emptiness in the stomach if you have had a recent endoscopic examination (looking down the gullet) to check if you have a peptic ulcer.

Always take the medicine exactly as your doctor tells you to. If you happen to miss any doses, take them as soon as you remember to do so. If you forget to take them on several occasions, your doctor may recommend your capsules with food or on an empty stomach.

Omeprazole is used to treat the following conditions:
- Gastro-oesophageal reflux disease (GERD)
- Duodenal ulcers
- Stomach ulcers
- Heartburn and acid reflux

Do not take Omeprazole if you are allergic to omeprazole or to any of the other constituents of this medicinal product.
