1. **What Prednisolone Soluble Tablets are and what they are used for**

- Prednisolone Soluble Tablets (called Prednisolone Soluble Tablets or Prednisolone Soluble Tablets for short in this leaflet) contain the active ingredient prednisolone.
- Prednisolone belongs to a group of medicines called steroids (also called corticosteroids). Corticosteroids occur naturally in the body and help to maintain the health of your body with other extra corticosteroids (such as prednisolone) is an effective way to treat various illnesses involving inflammation.

2. **How to take Prednisolone Soluble Tablets**

3. **Contents of the pack and other information**

   - The usual starting dose is two tablets (10mg Prednisolone) to two tablets (7.5mg to 10mg prednisolone) per day.
   - You may need to ask your doctor whether you are allergic to prednisolone or any of the other ingredients of this medicine (listed in section 6).
   - Signs of a severe allergic reaction include a red and lumpy skin rash, difficulty breathing, swelling of face, mouth, lips, tongue, and throat, high temperature (fever) and feeling faint. If the swelling affects your throat and makes breathing and swallowing difficult, go to hospital straight away.
   - If you have recently had or are planning to have any vaccines, tell your doctor before taking Prednisolone Soluble Tablets. This is because some injections or vaccinations should not be given to people who are taking prednisolone.
