If you get any side effects talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet (section 4).

If you have any further questions, ask your doctor or pharmacist.

Read all of this leaflet carefully before you start taking this medicine because it contains important information for you.

Keep this leaflet. You need to read it again.

If you have any other questions, ask your doctor or pharmacist.

If you are not sure whether you have to take this medicine or not, it may harm you. It may also harm others who may get access to your medicine.

Your doctor will tell you whether you should take Tramadol Hydrochloride 50mg Capsules, and what dose.

The risk of adverse effects:

- if you take tramadol, sleeping pills, other pain

Children

Tramadol Hydrochloride 50mg Capsules is not suitable for children below the age of 12 years.

Elderly patients

In elderly patients (above 70 years) the sensitivity of tramadol may be increased. If you apply to your doctor, your doctor may recommend you to monitor the dosage interval.

Severe liver or kidney disease

In such cases Tramadol Hydrochloride 50mg Capsules should not be used. If you need to be treated for a short time, your doctor will advise you which medicine to use and how long you should take it.

Tramadol Hydrochloride 50mg Capsules and at what dose

It is possible that the beneficial effect of Tramadol Hydrochloride 50mg Capsules is too strong or too weak, talk to your doctor or pharmacist.

You may take more Tramadol Hydrochloride 50mg Capsules than prescribed. If you have taken an additional dose by mistake, you should not take any further doses. Ask your doctor or pharmacist for advice before taking this medicine again.

If you are also taking MAO inhibitors (certain antidepressants), MAO inhibitors may mask the effects of perforated ulcers;

Chronic use during pregnancy may lead to withdrawal symptoms in new-borns.

Pregnancy, breast-feeding and fertility

You should not take Tramadol Hydrochloride 50mg Capsules as its effect may be decreased in women who are pregnant. You should not breast-feed while taking this medicine.

Pantone 280 C
