Ask your pharmacist if you need more information or advice.

You must contact your pharmacist or doctor if you have any problems with this medicine.

In this leaflet:
1. What DULCOLAX Suppositories are and what they are used for
2. Before you use DULCOLAX Suppositories
3. How to use DULCOLAX Suppositories
4. Possible side effects
5. How to store DULCOLAX Suppositories
6. Further information

1. WHAT DULCOLAX SUPPOSITORIES ARE AND WHAT THEY ARE USED FOR

DULCOLAX Suppositories contain a medicine called bisacodyl. This belongs to a group of medicines called laxatives.

DULCOLAX Suppositories are used for the short-term relief from occasional constipation.

The medicine does not help with weight loss or weight control.

DULCOLAX Suppositories are also used in hospitals to clear the bowel before surgery, X-rays or other tests.

DULCOLAX Suppositories stimulate the muscles of the bowel (large intestine). They have a laxative effect usually within 10 to 30 minutes.

What is constipation?
Normal and regular bowel movement is important for most people. However, whatever it is like for you, it is best for you to have a bowel movement every day, others less often. Whatever it is like for you, it is best that your bowel movement has a regular pattern.

Constipation is an occasional problem for some people; that your bowel movement has a regular pattern.

In particular, tell your pharmacist or doctor if you are taking any of the following medicines:

- Steroid medicines such as prednisolone
- Water tablets (diuretics) such as bendrofluazide or furosemide (frusemide)
- Steroid medicines such as prednisolone
- Other laxative medicines

Before using DULCOLAX Suppositories, tell your pharmacist or doctor if you are not sure if any of the above applies to you. If you are not sure, talk to your pharmacist or doctor before using this medicine.

Taking other medicines
Please tell your pharmacist or doctor if you are taking or have recently taken any other medicines, including medicines obtained without a prescription. This includes herbal medicines. This is because DULCOLAX Suppositories can affect the way some other medicines work. Also, some other medicines can affect the way DULCOLAX Suppositories work.

In particular, tell your pharmacist or doctor if you are taking any of the following medicines:

- Water tablets (diuretics) such as bendrofluazide or furosemide (frusemide)
- Steroid medicines such as prednisolone
- Other laxative medicines

Before using DULCOLAX Suppositories, tell your pharmacist or doctor if you are not sure if any of the above applies to you.

Pregnancy and breast-feeding
Talk to your pharmacist or doctor before using DULCOLAX Suppositories if you are pregnant, planning to become pregnant or are breast-feeding.

Driving and using machines
Some people may feel dizzy or faint while taking this medicine. If this happens to you, wait until these feelings go away before driving or using machines.

Whatever the cause, constipation is uncomfortable. It may make you feel bloated and heavy, or generally "off colour". Sometimes it causes headaches.

These healthy tips are recommended to try and prevent constipation happening:

- Eat a balanced diet including fresh fruit and vegetables
- Drink enough water so that you do not become dehydrated
- Keep up your exercise and stay fit
- Make time to empty your bowels when your body tells you

2. BEFORE YOU USE DULCOLAX SUPPOSITORIES

Do not use DULCOLAX Suppositories if:

- You are allergic (hypersensitive) to bisacodyl or hard fat (stearic acid) in medicines obtained without a prescription
- You have inflammation or ulcers around your back (anal fissures)
- You have inflammation of the bowel (small or large intestine)
- You have severe abdominal pain with nausea and vomiting
- You have severe dehydration

- You have inflammation or ulcers around your back (anal fissures)
- You have inflammation of the bowel (small or large intestine)
- You have severe abdominal pain with nausea and vomiting
- You have severe dehydration
3. HOW TO USE DULCOLAX SUPPOSITORIES

If this medicine is from your doctor or pharmacist, do exactly as they have told you. Otherwise, follow the instructions below. If you do not understand the instructions, or if you are not sure, ask your pharmacist or doctor.

As with all laxatives, DULCOLAX Suppositories should not be used every day for more than 5 days. If you need laxatives every day, or if you have abdominal pain which does not go away, you should see your doctor.

How to use the suppositories

The suppositories should only be used in your back passage.

1. Take off the foil wrapping
2. Lie on one side and pull your knees up towards your chest. Keep one leg drawn up more than the other
3. Use your first finger (index finger) or middle finger to push in the suppository
4. Gently push the suppository as far as possible into your back passage, pasado end first
5. Once it is as far as it will go, push it sideways to make sure it touches the walls of the bowel.
6. Lower your legs to a comfortable position whilst the suppository is retained in place
7. Keep the suppository inside you for at least 30 minutes

If you use the suppository, it will come out away:
- You may not have put it in high enough. Push it as far as possible
- Try to keep it in for 30 minutes, even if you feel like you urgently need to go to the toilet. This is how long it takes to work

How much to use

For constipation

Adults and children over 10 years
- Put one 10 mg suppository into the back passage for immediate effect. Only use one suppository per day.

Children under 10 years
- DULCOLAX 5 mg Suppositories for Children should only be used as recommended by a doctor. The usual dose is:
  - Put one 5 mg suppository into the back passage for immediate effect. Only use one suppository per day.

For bowel clearance before surgery, X-rays or other tests
- In hospitals, when patients are being prepared for surgery, X-rays or other tests, DULCOLAX Suppositories and DULCOLAX Tablets are both used. This helps to get complete bowel clearance.

Adults and children over 10 years
- Take two tablets in the morning and two tablets in the evening and use one 10 mg suppository on the following morning.

Children 4 - 10 years
- Give one tablet in the evening and one 5 mg suppository (DULCOLAX 5 mg Suppositories for Children) on the following morning.

If you use too many DULCOLAX Suppositories

It may be harmful to:
- Use too many DULCOLAX Suppositories or Use DULCOLAX Suppositories for too long
- Use too many DULCOLAX Suppositories

This is because using too many for too long may lead to:
- Impairment of fluid and salts in the body. This can affect the tightness of muscle such as those in the bowel. It can also affect the salts in the blood.
- Low levels of potassium in the blood (called ‘hypokalaemia’). This can make you tired, dizzy, make your muscles weak and cause an uneven heart beat.
- Dehydration, making you thirsty, feel faint and giving you headaches. It can also mean you cannot pass enough urine.

If you use more DULCOLAX Suppositories than you should

If you use more of this medicine than you should, talk to a doctor or go to hospital straight away. Take the medicine pack with you, this is so the doctor knows what you have taken.

If you have any questions on the use of this product, ask your pharmacist or doctor.

4. POSSIBLE SIDE EFFECTS

Like all medicines, DULCOLAX Suppositories can cause side effects, although not everybody gets them. The following side effects may happen with this medicine.

Rare side effects (affect less than 1 in 1000 people)
- Severe allergic reaction which may cause swelling of the face or throat and difficulty in breathing or diarrhoea. If you have a severe allergic reaction, stop taking this medicine and see your doctor as soon as possible.
- Colitis (inflammation of the large intestines which causes abdominal pain and diarrhoea). Dehydration
- Allergic reaction which may cause a skin rash

Uncommon side effects (affect less than 1 in 100 people)
- Blood in the stools
- Vomiting
- Abdominal discomfort
- Diarrhoea
- Nausea

Reporting of side effects

If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet (see details below). By reporting side effects you can help the drug additional adverse effects, although not everybody gets them. The following side effects may happen with this medicine.
